

## **What Do You Think About Your Child's Learning?**

Elk Island Catholic Schools' AISI team (Alberta Initiative for School Improvement) is surveying all administrators, teachers, students and parents regarding its Cycle IV project – Increasing Student Engagement through Assessment for Learning and Differentiated Instruction.

An important part of the survey is the information gathered from parents. As a parent, this is a great opportunity to provide feedback on the strategies that have impacted your child's learning.

The survey will be administered by University of Alberta Research Services and individual survey responses will be kept confidential. Information gathered from the survey will be used to improve student learning and build upon best practices.

All parents are encouraged to fill out the survey and provide their comments and feedback by March 17, 2010. The survey is available on school websites, as well as on the Division homepage under What's New.

Please take some time and complete the AISI survey.

Thanks.
